

SECO N 24 25

250mm, 350mm (Other strokes are available)

Applications

Features:

A certified and compliant actuator designed to provide precise and reliable operations for natural ventilation systems with the following features :

- Electronically defined closing force ensures a tight close on every operation and a programmable seal relief option to optimises window weather performance in a single enclosure.
- Virtually silent operation with selectable speed control providing accurate position for natural ventilation strategies.
- Slim compact design with standard or tailored finishes and flex lengths.
- Extensive range of bracketry to suit all window system applications.
- Extended warranty/life expectancy with operational frequency logging.

CE CERTIFIED

Compliant to applicable regulations.
